

# Mechanical Banks at Auction

Listed here are select antique Mechanical Banks sold at auction starting in October of 1994 through December 2019. These banks were generally in "Choice" or "Above Average" condition. While the finest examples often bring unpredictably high prices, low end banks and with problems (major breaks, repairs, poor paint, rust, etc.) can bring much lower prices. Desirability, condition, rarity, provenance, competition, and publicity are all factors in determining prices realized at auction (supply and demand). Many individual banks have sold more than once over this time period. Condition is from catalog listing. Prices include buyer's premium.
